

# Bulk Material Heat Exchanger

## Material: Solar Salt

- Unit heats 12.5 TPH of solar salt from 40°F to 180°F using hot oil.
- Unit housing fabricated of 316L stainless steel material.
- Heat transfer plates fabricated of 316L stainless steel material.
- Feed/Surge Hopper fabricated from 316L stainless steel material.
- Level transmitter for maintaining the proper depth of material in the heat exchanger.
- Supplied hot oil system to monitor and control temperature.
- Supplied PLC controls.
