

Aftermarket *Sales & Service*

Carrier Vibrating Equipment understands that timely access to genuine spare parts is essential for maintaining the reliability and performance of your equipment. We offer an extensive inventory of both fabricated and component aftermarket parts that are precision engineered and tested to provide reliable performance. In addition, our Aftermarket Sales team is committed to providing prompt, reliable ordering to ensure minimal downtime and optimal performance for your operations.

From technical support to onsite service, our expert service technicians are skilled in the practice of problem solving. Whether it's routine maintenance or an unexpected repair, our Service Department experts are dedicated to providing expedient solutions that minimize equipment downtime.

Precision Engineered Fabricated & Component Parts.
Reliable and Professional Equipment Maintenance & Service.

We Have You Covered:

- Fabricated Parts
- Authentic Component Parts
- Ready-To-Ship Inventory
- Equipment Service & Maintenance
- Commissioning Support
- Building Strong Relationships For Life

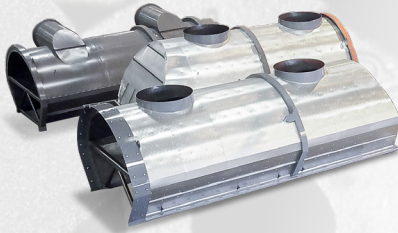

The logo for Carrier Vibrating Equipment, Inc. features the word "Carrier" in a large, bold, white sans-serif font, with a registered trademark symbol (®) to its upper right. Below "Carrier" is the phrase "Vibrating Equipment, Inc." in a smaller, italicized, black sans-serif font. The entire logo is set against a solid red rectangular background.

Aftermarket Parts

Common aftermarket parts include bearings, springs, and stabilizer arms but we have more than 75,000 parts available. With an inventory of over \$2 million dollars in parts and same day shipments available on any in-house part, our team strives for on-time delivery and maximum equipment uptime.

Fabricated Parts

- Replacement Troughs/Pans
- Hoods & Liners
- Fluidizing Decks
- Plenums
- Exhaust Headers
- Drive Rebuilds
- And More

Authentic Component Parts

- Carrier OEM Parts
- Bearings & Stabilizer Arms
- Metal Coil Springs
- Leaf Springs
- Bushings
- Shafts
- And More

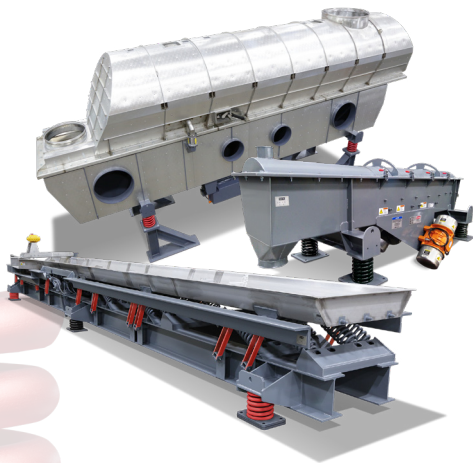

In-House Machining

With in-house machining capabilities, we deliver fabricated replacement parts in rapid time.

Competitor Parts

Ask us how we can provide replacement parts or rebuild competitors' equipment.

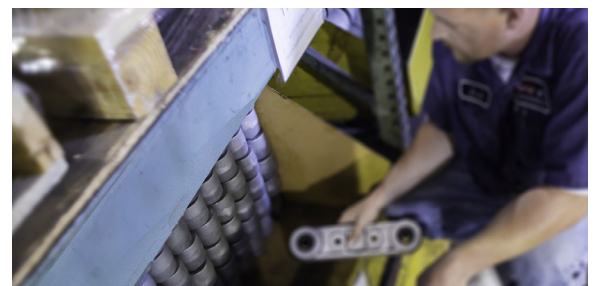

With our team's extensive knowledge and experience, we can access your parts needs and recommend the best solution. We process thousands of parts orders each year and offer discounted parts with the purchase of any new piece of equipment. In addition, our engineers are available to assist in any redesign or retrofit of your existing equipment for new applications.

Aftermarket Parts for Equipment

- Vibrating / Static Fluid Beds
- Flash & Tornesh Dryers
- Vibratory Conveyors & Spiral Elevators
- Vibratory Feeders & Screeners
- Bulk Flow Heating / Cooling Exchangers
- Attrition Mills & Lump Breakers
- Bin & Storage Pile Dischargers
- Shakeouts
- Circuit Boards & Controls
- And More

Available 24/7

Our aftermarket team is available to process your order any time of day. We have inventory readily available for quick delivery. Most orders are processed within 24 hours, with stock components guaranteed to ship within three working days, and many parts can be shipped the same day. Shipping arrangements, either by truck, rail, air, or ocean, are easily accommodated at the most economical routing possible.

Service & Maintenance

We understand that your equipment is the backbone of your operation. That's why we offer top-notch equipment service and maintenance solutions designed to minimize downtime. Whether you need routine maintenance, emergency repairs or specialized upgrades, our professional Service Department has the knowledge and experience to ensure your equipment operates at its peak performance - safely and efficiently.

Service Agreement Program

A Carrier service technician would visit your facility four times a year. The visits would be tailored specifically towards preventive maintenance, with each piece of Carrier equipment wear components visually inspected and recorded for stroke and frequency. Measurements are benchmarked for future comparison.

Onsite Preventative Maintenance Training

A Carrier service technician will conduct a one or two day, 8-hour seminar onsite for a nominal fee. The program is designed to educate plant personnel in identifying possible trouble areas prior to the point of a failure. It also addresses proper techniques such as drive installation and drive timing.

Service You Can Trust.
Technicians You Can Rely On.

Emergency Consultation 24/7

Service is available for emergency consultation 24 hours a day, seven days a week, including holidays.

Commissioning Support

Proper commissioning of equipment is crucial for its optimal performance. Our team of commissioning experts is equipped with the knowledge and tools to ensure a seamless start-up process. We provide installation training and installation supervision for any piece or part of our equipment in order to minimize potential disruptions and deliver a reliable and efficient running process system.

Expedite ROI

By partnering with our commissioning specialists for start-up support, an accelerated time-to-market will be realized. Our team will ensure the quickest start-up time possible so your process operation begins generating revenue.

Commissioning Services

- Training
- Supervision
- Troubleshooting
- Process Validation
- And More

Customer-Centric Approach

At Carrier Vibrating Equipment, we prioritize building strong relationships with our customers. It's only when we get to know you and understand your unique requirements that we are able to deliver tailored solutions that add value to your operations.

We value our customers' trust and are committed to providing reliable solutions, consistently meeting or exceeding your expectations.
